Herr Gerald und Frau Else Schiller

Congratulations! The German Bund scored a double-header on Friday, September 21st. Wow! Both the P-G and the T-R together. And with such precise timing. I haven't witnessed anything like that since the Nazis utilized their panzer divisions to overrun much of Western Europe and kill millions of innocent people in World War II.

I have a little poem I would like to privately dedicate to the two of you.

What makes your bavarian garden bloom so well?
If you tell me the truth, I promise not to tell.
Presumably, ample fertilizer is the underlying basis.
Would using exterminated Jews be considered too racist?

Ever since you informed me that you really are Jews, I have been bursting with curiosity. Regrettably, all my investigative efforts have proven to be unsuccessful in attempting to learn more about your Hebraic heritage. Gee, who knows? Considering how the Jews were forced to move from one part of Europe to another over the past centuries in order to avoid being slaughtered, I would think it might even be possible that we shared some of the same ancestors. Pray, tell me more about your Jewish background so that I can hopefully be more successful in researching this matter more completely.

Herr Gerald and Fraulein Else Schiller

In the meantime, I must commend you for having conceived of the perfect plan to keep yourselves from being physically attacked, threatened, or otherwise victimized by any anti-Semites residing in your non-Jewish neighborhood.

Truly a masterful disguise!

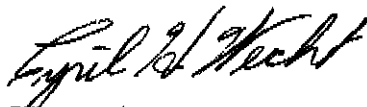

You simply pretend – through repeated venomous, malevolent letters to the editor of our two local newspapers – to be virulent anti-Semites.

Not to worry!

I am much too much of a gentleman, as well as an empathetic fellow Jew, to give away your ingenious secret.

Auf wiedersehen.

Very truly yours,

Cyril H. Wecht, M.D., J.D.
